

1. Check num is positive

```
public class Main
{
    public static void main (String args[]) {
        int num = 5;
        if (num > 0) {
            System.out.println("num is positive");
        }
        else {
            System.out.println("num is not positive");
        }
    }
}
```

2. Check num is negative

```
public class Main
{
    public static void main (String args[]) {
        int num = -5;
        if (num < 0) {
            System.out.println("num is negative");
        }
        else {
            System.out.println("num is not negative");
        }
    }
}
```

3. check odd or even num

```
public class Main
{
    public static void main (String args[]) {
        int num = 5;
        if (num %2 == 0) {
            System.out.println("num is even");
        }
        else {
            System.out.println("num is odd");
        }
    }
}
```

4.display good morning message based on time

```
public class Main
{
    public static void main (String args[]) {
        int time = 5;
        if (time >= 5 && time <= 12) {
            System.out.println("Good Morning!");
        }
        else {
            System.out.println("Not Marning!");
        }
    }
}
```

5.print area of square : $\text{area} = \text{side} * \text{side}$

```
public class Main
{
    public static void main (String args[]) {
        int side = 5
        int area = side * side;
        System.out.println("Area of Square: " + area);
    }
}
```

6.print area of rectangle : area = length * width

```
public class Main
{
    public static void main (String args[]) {
        int lenght = 5;
        int width = 8;
        int area = lenght * width;
        System.out.println("Area of Rectangle: " + area);
    }
}
```

7. find the largest of three num

```
public class Main
{
    public static void main (String args[]) {
        int a = 5;
        int b = 8;
        int c = 5;
        if (a>b && a>c) {
            System.out.println("largest num is a");
        }
        else if (b>a && b>c) {
            System.out.println("largest num is b");
        }
        else {
            System.out.println("largest num is c");
        }
    }
}
```
